

Individual Status Report 2

Goals from last week:

Complete user card: Allow users to sign into accounts and have appropriate access to user functions

Attend team meetings for this week and help team members with user cards if needed

During team meetings, evaluate our progress and decide on the following weeks goals

Test my own user card solution along with teammate's user card solutions

Make sure all tickets will be compatible once completed

Progress from this week:

What I did:

I was able to attend team meetings this week.

I did not complete the user card I was assigned.

Tickets were confirmed as compatible with each other after we updated them.

What I learned:

I learned more use cases of flask for POST requests and link creation

Where I had trouble:

Time management, will catch up quickly and try to get ahead.

Where I am stuck:

Currently no issues

Plans and goals for following week:

Complete my user card from last week.

Update backlog as needed.

Help team with data flow diagram and other models.

Check with team members user card solutions for code compatibility.

Work ahead on next user card.
