

## Individual Status Report 3

### Goals from last week:

- Complete my user card from last week.
- Update backlog as needed.
- Help team with data flow diagram and other models.
- Check with team members user card solutions for code compatibility.
- Work ahead on next user card.

### Progress from this week:

#### What I did:

- I was able to attend team meetings this week.
- I was able to complete the user card I was behind on (user login page).
- I was also able to create the framework for our site's database and flask.py file.
- I was able to review the data flow diagram and advise on changes.
- Tickets were confirmed as compatible with each other after we updated them.

#### What I learned:

- I learned how to create a database for use with flask in the flask practice 4.
- I learned how to use flash messages in flask. I used this for incorrect login attempts.

#### Where I had trouble:

- Time management, plan to work lots this week on the project. The first demo of our product is due soon.

#### Where I am stuck:

- Currently no issues

### Plans and goals for following week:

- Complete the user card for creating an event within our product.
- Update backlog as needed.
- Help team with creating test cases for our product.
- Work ahead on next user card.
