Individual Status Report #3

1. Goals from last week

- o Develop skeleton of the Create Account page
- o Test that the Create Account page works
- o Join Create Account page with other developed parts of the website and test functionality
- o Meet with team to agree on general website layout/behavior

2. Progress made this week

- o Helped create Level 0 (Context diagram) and Level 1 data flow diagram
- o Helped label Lo-Fi UI prototypes with function names for each UI element, view names for each webpage, database field names for each input field and route actions for each action in the app.
- o Completed user story of "User should be able to register for an account". User account information is now stored in a database. Email is validated to ensure it hasn't been used yet and that it is an actual email.

3. Goals for this week

- o Help finish the homepage and create events pages of website.
- o Help team describe features and their scenarios for testing some of our user stories
