Individual Status Report 1

Goals from last week:

    Assemble team members for first meeting

    Decide on communication platforms for team members

    Decide on software features for project

Progress from this week:

    What I did:

        Decided on features and appropriate user cards for our project with team members

        Our backlog was finalized, and user cards were assigned to team members for the TODO for the coming week

        Implemented simple Flask commands to display a rudimentary note taking website

    What I learned:

        I learned how to navigate the UI of Trello

        I learned some of the commands of Flask

    Where I had trouble:

        Only minor issue is Trello doesn't allow deletion of user cards

    Where I am stuck:

        Currently no issues

Plans and goals for following week:

    Complete user card: Allow users to sign into accounts and have appropriate access to user functions

    Attend team meetings for this week and help team members with user cards if needed

    During team meetings, evaluate our progress and decide on the following weeks goals

    Test my own user card solution along with teammate's user card solutions

    Make sure all tickets will be compatible once completed
