Individual Status Report 4

Goals from last week:

> Complete the user card for creating an event within our product.

> Update backlog as needed.

> Help team with creating test cases for our product.

> Work ahead on next user card.

Progress from this week:

> What I did:

>> I was able to attend team meetings this week.

>> I was able to complete the backend of the "create event" user card.

>> I was able to create a rudimentary/unpolished front end for the user card as well.

>> We updated the backlogs to reflect the TODO for upgrading our authentication of user logins/sessions.

> What I learned:

>> I learned how to create a unit testing framework around flask apps.

>> I learned how to update/delete database entries with our flask app and sqlite3.

> Where I had trouble:

>> Time management, plan to work lots this week on the project. The first demo of our product is due soon.

> Where I am stuck:

>> Currently no issues

Plans and goals for following week:

> Meet more frequently with team to ensure a good deployment of our MVP.

> Complete the user card login and register of users with the updated authentication methods.

> Update backlog as needed.

> Help team with creating test cases for their user cards.

> Finalize our MVP main branch for release to TAs/instructor.
